

Statmon Technologies Corp. and Digital Nirvana Inc. Announce a Collaborative Project and Preferred Partnership Agreement

New York, New York – HD World, October 14, 2009, Statmon Technologies Corp., a broadcast, wireless network, and infrastructure technology management and solution provider, and Digital Nirvana, Inc. a provider of broadcast monitoring and media management solutions, today unveiled a collaborative project and preferred partnership agreement involving Statmon Technologies Corp. AXESS® technology management platform and Digital Nirvana’s Monitor IQ® Broadcast Monitoring System.

The integration of these two world class platforms creates a uniquely insightful and intuitive management environment encompassing discrete device as well as third party systems management (both monitoring and control), digital transport stream monitoring and reporting, Nielsen® LPM® data monitoring and reporting, content recording, monitoring and reporting, along with facilities management as a cohesive integrated view into the entire broadcast enterprise from ingest to transmission/distribution.

Messrs. Geoffrey Talbot, the Chairman and CEO of Statmon Technologies Corp. and Hiren Hindocha, CEO, Digital Nirvana Inc., indicated that “the integration and enhanced capabilities of AXESS® and MonitorIQ® give the broadcaster, content originator, and content distributor greatly improved centralized monitoring and control capabilities that enhance the timely isolation of problems, thus reducing operational expense and adding efficiency”.

The solution provides unprecedented functionality by providing quick and accurate identification and mapping of exceptions and discrepancies in the broadcast signal to the actual video content by leveraging AXESS’s® ability to aggregate and present unlimited quantities of data from devices, remote sites, and third party systems into a customizable intuitive interface and Monitor IQ’s® ability to record, monitor, clip, repurpose and distribute content (both HD and SD) for either internal or external purposes.

Please visit us during HD World, Booth 1339, October 14 and 15, 2009, at the Javit’s Center in New York City to see firsthand the seamless integration of these world-class management and monitoring platforms and realize the power of our preferred partnership.

About Statmon Technologies Corp.

Statmon Technologies Corp. is a broadcast, wireless and fiber infrastructure network management solution provider. AXESS®, its proprietary software application, and its supporting integration products are deployed in broadcast, telecommunications, and navigational aids transmission networks to optimize operations and ensure network continuity and functionality. The AXESS® platform is designed to self-heal and preempt network failure by automating the integration of disparate devices and technologies in a diverse network infrastructure under a single “over arching” control and monitoring solution that permits manual or automated corrective action at a network operations center or from any connected computer to include wireless devices. The Company is headquartered in Bannockburn, IL, a Chicago suburb, and its shares are traded in the OTC Bulletin Board under the symbol “STCA.OB.”
